

# Three things to know after surgery

DRAFT • PENDING CLINICAL REVIEW

1

DAY 2

## Remove the head dressing

1

Remove the mastoid dressing, or head bandage.

2

Check whether tape covers the incision behind the ear.

2

DURING RECOVERY

## Watch for all three signs

Call your surgeon or clinic staff only if all three signs below are present.

1

Red and swollen

2

Not getting better  
Over the next 1-2 days

3

Hurts when touched

ALL 3 → CALL

3

AFTER HEALING

## Return for programming

An audiologist programs the speech processor you wear outside your ear.

The program is made for your needs.
